## Summary

AI/ML undergraduate skilled in problem-solving, analytical thinking, and technical communication, software development, deep learning, and full stack technologies with experience building real-world AI and data-driven applications.

## Technical Skills

|                        |                                                                            |
|------------------------|----------------------------------------------------------------------------|
| Programming Languages  | Java, Python, C, C++, JavaScript                                           |
| Frameworks & Libraries | TensorFlow, Scikit-learn, Flask, Django, React.js, Node.js, Express.js     |
| Cloud & Deployment     | Docker, AWS, Vercel, Hugging Face                                          |
| Databases              | MongoDB, SQL, PostgreSQL                                                   |
| Developer Tools        | Antigravity, Cursor, Windsurf, Claude, Gemini CLI, ChatGPT, GitHub Copilot |
| Core Concepts          | Machine Learning, Deep Learning, REST APIs, Data Visualization             |

## Education

|                                                                                                    |                                     |
|----------------------------------------------------------------------------------------------------|-------------------------------------|
| <b>Vellore Institute of Technology, Bhopal</b><br>B.Tech in Computer Science & Engineering (AI/ML) | 2023 – Present<br><b>CGPA: 8.98</b> |
| <b>Holy Public School, Agra</b><br>Higher Secondary Education                                      | 2021 – 2022<br><b>83%</b>           |

## Projects

|                                                                                                                                                                                                                                                                                                                                                                         |                       |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------|
| <b>Code Reviewer AI—React, Node.js, Express, Gemini API</b><br><a href="https://github.com/Yash-2808/Code-Reviewer-AI">https://github.com/Yash-2808/Code-Reviewer-AI</a>                                                                                                                                                                                                | March 2026 – May 2026 |
| <ul style="list-style-type: none"><li>Developed a full-stack AI-powered code analysis platform enabling code conversion, intelligent debugging, and automated code quality evaluation using the Google Gemini API.</li><li>Designed REST APIs with Express and integrated a React-based editor to provide an interactive and seamless experience.</li></ul>             |                       |
| <b>DriverGuard AI – Driver Distraction Detection System</b><br><a href="https://github.com/Yash-2808/Distracted-Driver-Detection-using-deep-learning">github.com/Yash-2808/Distracted-Driver-Detection-using-deep-learning</a>                                                                                                                                          | Dec 2025 – Jan 2026   |
| <ul style="list-style-type: none"><li>Developed a real-time driver distraction detection system using TensorFlow and the V7 Plus model.</li><li>Achieved <b>96% accuracy</b> across 10 driver behavior categories using transfer learning and AdamW optimization.</li><li>Built a Flask-based web application for real-time prediction and driver monitoring.</li></ul> |                       |
| <b>Chemical Equipment Parameter Visualizer</b><br><a href="https://github.com/Yash-2808/Chemical-Equipment-Parameter-Visualizer">github.com/Yash-2808/Chemical-Equipment-Parameter-Visualizer</a>                                                                                                                                                                       | Sep 2025 – Nov 2025   |
| <ul style="list-style-type: none"><li>Developed a hybrid web and desktop application for CSV-based chemical equipment visualization.</li><li>Built Django REST APIs, React dashboards, Chart.js and PyQt5 visualization tools.</li></ul>                                                                                                                                |                       |

## Experience

|                                                                                                                                                                                                                                                                                                                                                           |                     |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------|
| <b>Web Development Intern – Ramaya Group Pvt. Ltd</b>                                                                                                                                                                                                                                                                                                     | Oct 2025 – Jan 2026 |
| <ul style="list-style-type: none"><li>Designated on internal website development projects under professional supervision</li><li>Developed responsive web pages and improved website functionality through frontend enhancements.</li><li>Collaborated with teams to deliver projects within deadlines following industry practices.</li></ul>            |                     |
| <b>Core Member – UX Club, VIT Bhopal</b>                                                                                                                                                                                                                                                                                                                  | Nov 2025 – Jan 2026 |
| <ul style="list-style-type: none"><li>Collaborated closely with designers and organizers to research, plan, and create meaningful content for workshops, events, and digital platforms, ensuring clarity, accessibility, and consistency with UX principles.</li><li>Created user-focused content for workshops, events, and digital platforms.</li></ul> |                     |

## Certifications

|                                                                                          |                     |
|------------------------------------------------------------------------------------------|---------------------|
| <b>Introduction to Internet of Things (IoT)</b> , NPTEL IIT Kharagpur (Elite Grade, 85%) | Jan 2026 – Apr 2026 |
| <b>Applied Machine Learning in Python</b> , University of Michigan                       | Nov 2025 – Jan 2026 |
| <b>AWS Technical Essentials</b> , AWS Training & Certification                           | Sept 2025           |
| <b>Cloud Computing (Elite Topper, 82%)</b> , NPTEL IIT Kharagpur                         | Jan 2025 – Apr 2025 |

## Achievements

- Achieved 96% model accuracy in DriverGuard AI.
- Participated in Health4Hackathon and HP Power Lab Hackathon.
- Ranked among Elite performers in NPTEL Introduction to IoT certification by IIT Kharagpur with an 85% score.
